# Enhancing Independent Remote Learning

By Janec Paredes

Today´s world need people who can take an active role in their learning, self-directed people, capable of making the right choices and solve problems.
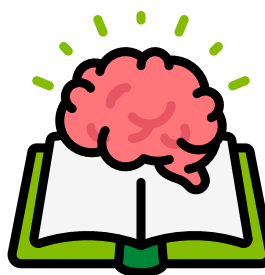

## Teacher´s role:

Teach

Model

Apply

Learners role:

Learn

apply

transfer

1. **Set their own Learning Goals**
SMART (Specific, Measurable, Achievable, Relevant, Time bound)
Outcome: What am I getting better at?

2. **Lifelong Learning Strategies.**
Start small and train your students to choose the strategies than can be applied in different situations, tasks and subjects.

Metacognitive Strategies
Help learners plan for learning, determine how they are doing, identify and solve problems and assess how well they have achieved their goal.

- Set goals
- Monitor progress
- Assess: Self questioning
- **Manage your learning:**
  Identify how you learn best, seek
- opportunities to practice

Task-based strategies
Help the learners to focus on a specific task by identifying how to use background knowledge, their senses, different resources, and their organizational skills.

- Make connections, use background knowledge
- Make inferences
- Predict
- Personalize.
- Transfer
- Summarize, paraphrase, classify

3. **Learning Choices:**
Provide choices that help your students to choose from

Activity I prefer to do first

Agroup work that better suits my needs

4. **Autonomy:**
Help your students generate their own task

A. Questions
B. Tasks
C. Evidence
D. Projects
E. Resources

Collaborative Learning

Independent Learning

5. **Reflection & Feedback. Guide your students to:**

- Identify what has gone well
- Identify areas of improvement
- Reflect on the resources and strategies they have used
- Think about what they can do different
- Use a scale to measure
