

# What is hybrid learning?

It is a type of blended learning that refers to implementing synchronous lessons that are taught simultaneously in-person and online.

**Tip # 1:** Identify your hybrid teaching scenario: resources, concerns, challenges, etc.

### Face to face students

- Safety concerns
- Technology available?
- Social distancing required?
- Concerns on technical issues
- Social-emotional concerns
- Collaborative work planning ideas
- Behavior challenges
- Some proactive measures & tools

### Online students

- Safety concerns
- Technology available?
- Social distancing required?
- Concerns on technical issues
- Social-emotional concerns
- Collaborative work planning ideas
- Behavior challenges
- Some proactive measures & tools

**Tip # 2:** Identify some proactive measures and tools for your specific scenario

**Tip # 3:** Use some of these better practices:

- An asynchronous backup plan (pre-recorded video explanations)
- **Arrange devices so that all the students can see and hear:**  
cheap external camera to connect to zoom and special microphone (if possible)
- Find the best way to project and share your screen
- Clear, detailed, visual reminders of instructions (video)
- Use class time to focus on remote students.
- If f2f students have computers, online and f2f students can collaborate
- Scaffold activities to increase participation

**Tip 4:** Adapt your planner so that you can easily think on how to adapt activities
